Carpet 101-Tips for Stressless Buying

TARR rating makes selecting carpet easy.

Texture Appearance Retention Rating or TARR tests a carpet's ability to remain tufted, it's original shape, after being properly installed and maintained in commercial setting. These ratings simplify your carpet selection by taking the guesswork out of your carpet buying experience.

Ratings are categorized as Moderate, Heavy and Severe* based on their end use in a specific application. Carpets are tested in environments that mock everyday foot traffic to simulate commercial settings. The better and longer the carpets keep their original, tufted shape the higher their rating. By using this guideline, you can quickly and easily select a commercial carpet with a TARR rating ideal for your flooring renovation. [See our selections.](#)

Carpet Ratings

TARR Ratings are ranked as Moderate, Heavy and Severe. These classifications categorize commercial carpet's ability based on anticipated frequency and intensity of foot traffic exposure. These ratings help to identify how well a particular carpet will perform in specific application.

Moderate	Heavy	Severe
Offices	Classrooms	Airports
Examination Rooms	Libraries	Medical Facilities
Areas with light foot traffic	Military Housing	Multipurpose Areas
