Beauty is a
problem solved.

Welcome to Crossville, Inc.

Every project is unique. Every space is an opportunity. When Crossville's creative solutions are put to work, new heights of functional design are accomplished. These successful outcomes last for decades with endless visual appeal. Welcome to Crossville, where beauty is a problem solved.

Ready to answer your unique needs.

With over 30 years of experience in our industry, we're adept at answering the unique needs of customer groups. Our range of special programs and products are thoughtfully developed to make life simpler for architects, contract designers, residential designers, retailers, and specifiers for national accounts. Whatever you need, we—alongside our distributors' sales teams—are ready to assist.

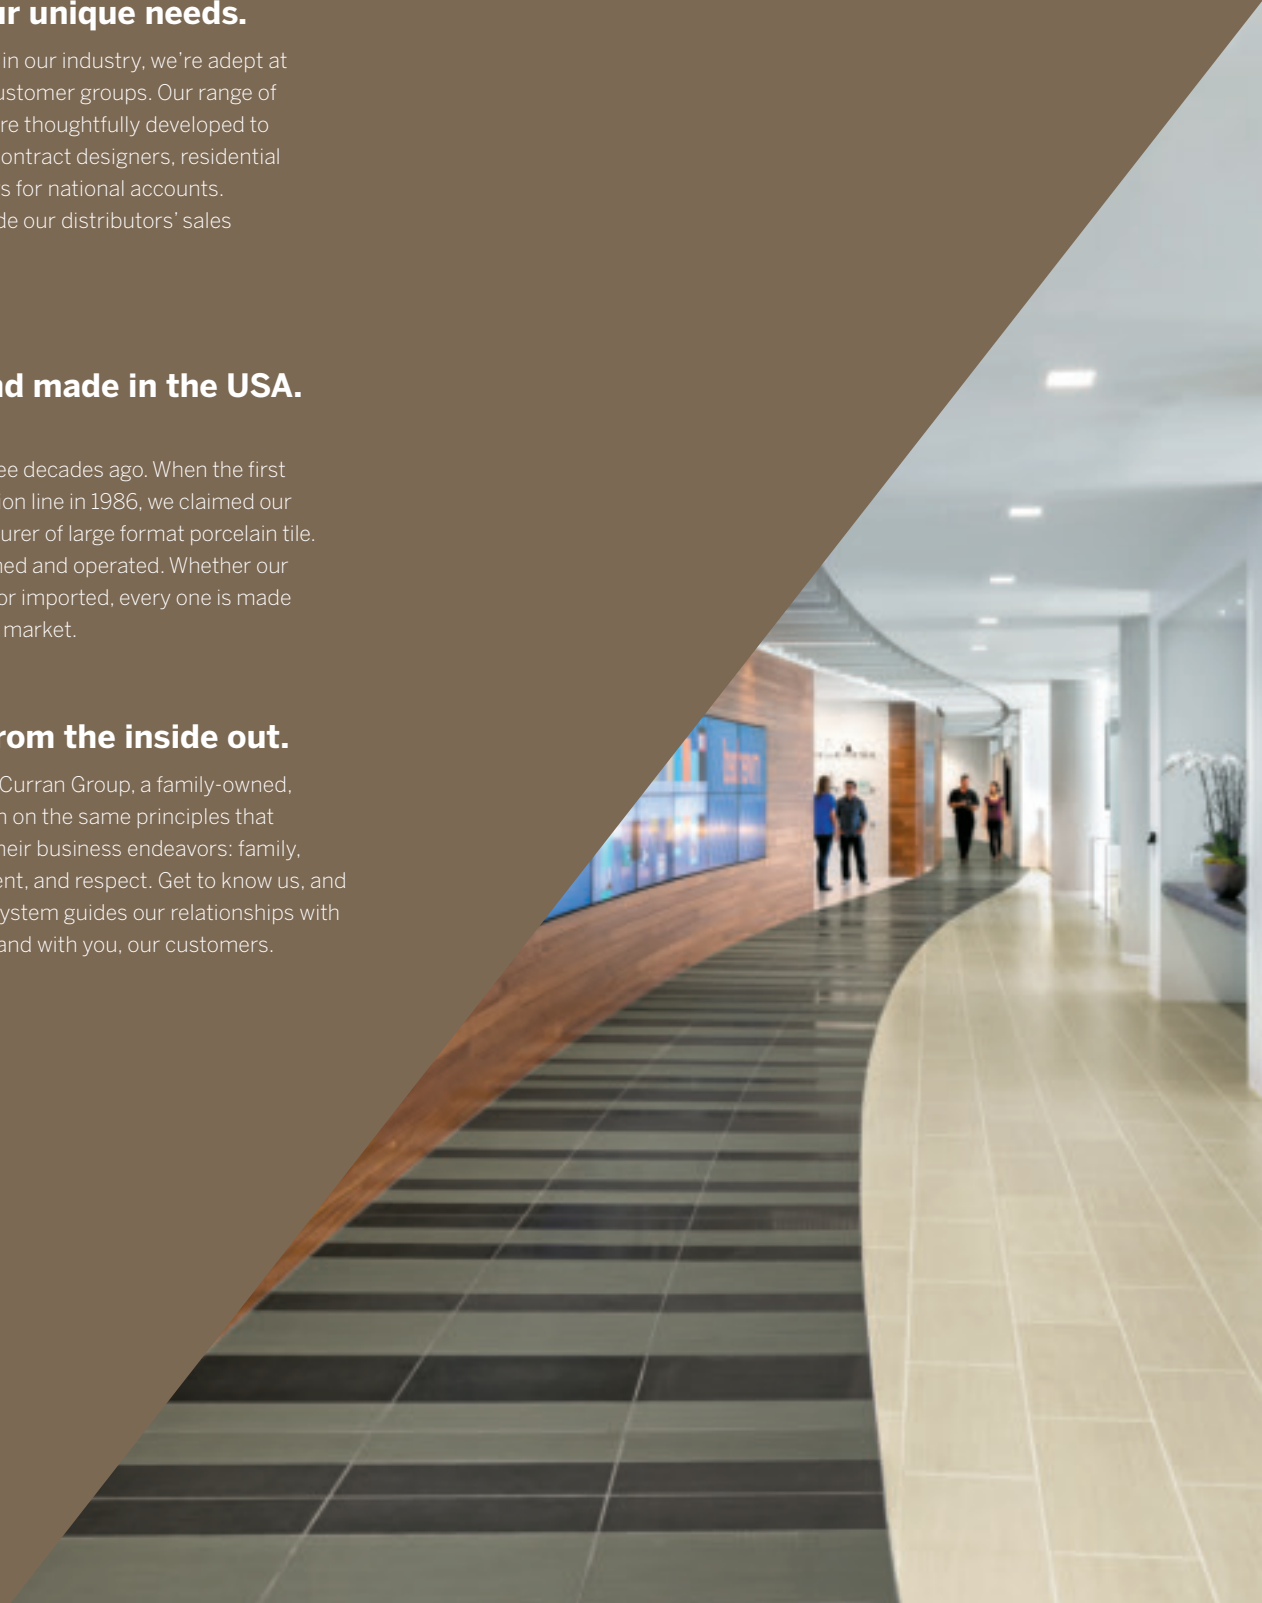

Designed and made in the USA.

We were born in the USA over three decades ago. When the first piece of tile rolled off our production line in 1986, we claimed our place as America's first manufacturer of large format porcelain tile. We've always been American owned and operated. Whether our products are made in Tennessee or imported, every one is made expressly for the North American market.

Highest standards from the inside out.

Crossville® is a subsidiary of The Curran Group, a family-owned, privately held corporation. We run on the same principles that the Currans are known for in all their business endeavors: family, partnership, integrity, improvement, and respect. Get to know us, and you'll find that our unique value system guides our relationships with employees, business associates and with you, our customers.

Sustainably green practices & products.

At Crossville, socially responsible has been at our core since Day 1. With a solid commitment to the environment, we've led our industry in the creation of sustainable practices. The results are greener products for you and a healthier environment for us all. Here's a look at our green advancements.

Green Squared Products

We're the first manufacturer to earn TCNA's Green Squared certification across all U.S.-made porcelain tile product lines. That means our Crossville manufactured collections meet the most stringent industry standards in sustainability.

EcoCycle Tile Process™

Crossville recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. Every tile will meet our high standards of sustainability, every time.

Fired Porcelain Recycling

We're the first large-scale manufacturer to invent a method of recycling fired porcelain to create feed stock for new tile.

TOTO USA Partnership

We partner with sanitary ware maker TOTO USA to recycle that company's pre-consumer fired waste into tile. As a result, we've diverted millions of pounds of waste from landfills and are a net consumer of waste—meaning we recycle more waste than we produce in manufacturing.

Tile Take-Back™ Program

This program—the only one of its kind—takes in post-consumer fired tile that was previously installed and recycles it to make new tile.

Recycled Content

All of our domestically produced products contain pre-consumer recycled content.

Water Conservation

Our closed loop water recycling system drastically reduces our fresh water needs.

Local Sourcing

From our clay and raw materials to our trucks, packaging and printing, we strive to acquire what we need to make and market our products from within 200 miles of operation.

Hydrotect™

Our Hydrotect coating can be applied to almost any of our porcelain collections to give tile easy cleaning and air purifying properties. Learn more on page 120 of this catalog.

Finishes and Textures

Crossville® offers designers, architects, and builders the utilitarian textures to answer the specific needs of those areas with the highest exposure. These textures are an integral part of the tile and cannot be worn down. No matter how technical the specifications, we have a surface that is highly functional, yet able to blend beautifully with any design application. Please refer to the Tile Performance Data chart in the back of this catalog for actual tile performance details.

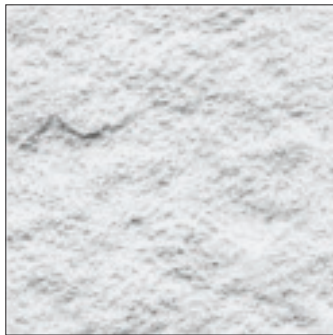

Unpolished (UPS)

Cross-Sheen® finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen® finish is appropriate high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen® finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

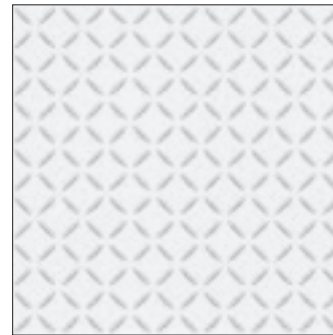

Polished (PO)

Polished Porcelain Stone® is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Cross-Slate® (CS)

The Cross-Slate® finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone® for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

Cross-Tread® (CTS)

Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread® surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Wet DCOF

Unpolished (UPS)	Cross-Tread® (CTS)*
0.50 – 0.60	0.50 – 0.60
Polished (PO)	Cross-Slate® (CS)
0.31 – 0.41	0.50 – 0.60

*The increased real world traction of these types of surfaces cannot be fully realized by our current DCOF testing methodologies due to their exaggerated facial structure.

** Sold as loose pieces

+ Linear Mosaic consists of 15 x 98, 23 x 148, and 38 x 148 tiles

Recommended Use

Yin + Yang natural stone is recommended for interior and exterior walls. It is recommended for dry interior floors. Yin + Yang is not suitable for the lining of pools, fountains, or spas.

This natural stone displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure optimum installation.

Care and Maintenance

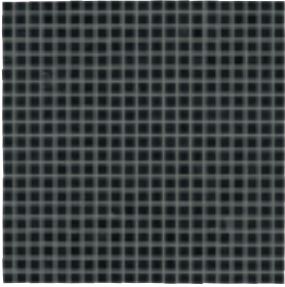

For complete care and maintenance information of stone products, the Marble Institute of America provides extensive information on their website, marbleinstitute.com/consumers/care.cfm. Phone (440) 250-9222.

* Please note that the various tile planks and mosaic in the Yin + Yang series are modular with each other however; the facial dimensions and thickness of cut stone tiles can vary. These irregularities are what gives stone tiles and mosaic their handmade appearance. As such, very narrow grout joints and precise alignment of the field tiles may be difficult to achieve.

1/2 x 4	9/16 x 3-7/8	1/4
1/2 x 6	9/16 x 5-7/8	1/4

1/8 inch grout joint on all mosaic sheets

*Actual size of mounted sheet is 11-3/4 x 11-3/4

** Actual size of mounted sheet is 11-3/4 x 13

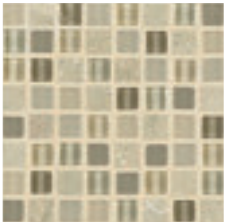

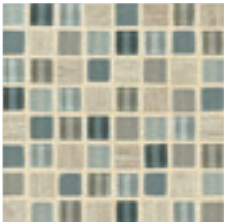

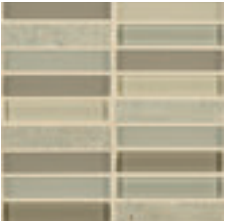

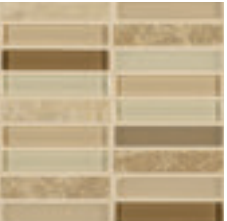

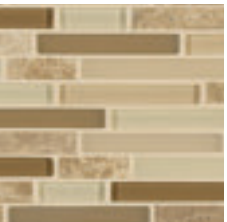

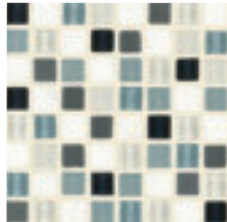

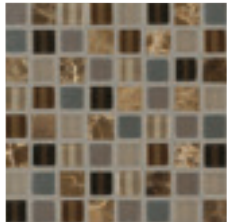

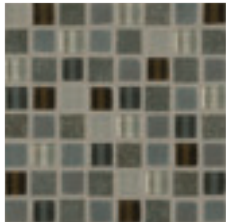

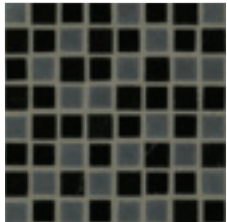

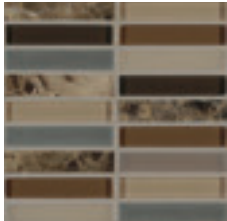

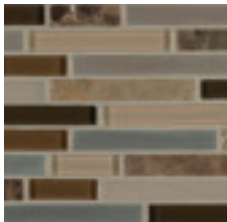

Recommended Use

Crossville's Ebb & Flow mosaic can be used for interior walls and covered exterior wall applications. In wall applications exposed to regular moisture (such as shower walls) the application of a penetrating sealer, such as Miracle 511 Impregnator, is required. See detailed installation instructions at CrossvilleInc.com.

Sideview Glass tile can be used for interior walls in wet or dry applications.

Cleaning

Regular cleaning is the best way to keep Sideview Glass tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

Recommended Use

Crossville® recommends Handwritten tile for interior vertical surfaces in all residential and light commercial applications. Applications may include light-duty bathroom walls, vanity tops, kitchen backsplashes, and light-duty kitchen countertops.

**Handcrafted Variation

Handwritten tiles are manufactured to appear handmade. Due to this handmade appearance, variations in size, thickness, flatness and color are to be expected. Therefore, blending the tile before and during installation is recommended.

Wall Tile
Beauty is significant defined.

Exterior Cladding

Porcelain Stone®

Archer Hotel. Design Firm: LK Architecture

EXTERIOR CLADDING

Using Crossville's Porcelain Stone® for cladding offers both aesthetic appeal and structural functionality. Appropriate for seismic zone usage, graffiti resistant, and engineered for utility savings due to thermal mass advantages, Porcelain Stone® tile is a perfect solution.

Field Applied

Timeless, tried, and true, tile has been used for centuries as a field applied exterior covering. With Crossville's American-made Porcelain Stone®, you now have the advantage of Cross-Sheen®. This graffiti-resistant finish protects your structure from the elements as well as spray paint and marker. Recent projects include the Los Gatos Library, DeAnza High School, and Ashland Youth Center. Log on to CrossvilleInc.com to read their stories. Contact us at Crossc@CrossvilleInc.com.

Cross-Sheen® is recommended for interior floors and walls and exterior walls.
Photo courtesy: Technical Imagery Studios

CROSS-SHEEN®

Protect your Crossville tile from stains, scuffs and graffiti

Cross-Sheen®, exclusively from Crossville, is an invisible, integrated finish that protects the look of nearly any Crossville tile from the defacing effects of scuffs, stains, even permanent marker, and graffiti. By creating an advanced, easier-to-clean tile surface, Cross-Sheen allows for fast removal of unsightly marks using only mild cleaner, resulting in truly hassle-free installation, cleaning and long-term maintenance of your Crossville tile.

Unlike expensively applied, non-permanent anti-graffiti coatings,

Cross-Sheen is incorporated directly into the surface of the tile, so it will never scrape off or wear off. Made in the USA to stringent specifications, Cross-Sheen is a beautifully advanced solution for exterior and interior walls and interior flooring in residential or commercial applications.

*Excluding Polished (PO), Honed (HON) and Satin (SAT) finish tiles

HYDROTECT™ COATING

Our porcelain tiles are available with Hydrotect. Crossville's revolutionary invisible coating harnesses the power of light, water, and oxygen to create the best defense against dirt and pollution. Whether indoors or out, floors and walls stay cleaner, providing a superior experience in any space. For complete details check our website at CrossvilleInc.com.

Self Cleaning.

Imagine an exterior facade that cleans naturally with just water, saving you maintenance costs and keeping your design looking great. Unlike most surfaces, tiles coated with Hydrotect™ by Crossville® attract water to the surface. With rain, water is able to get under dirt and grime and wash it away, naturally. And better yet, everyday exterior humidity causes a fine film of water to build on the tile, preventing the adhesion of dust and oily dirt. Even algae is no match for Hydrotect. The photocatalytic process degrades it naturally, so no toxic chemicals are needed to keep your building looking sharp.

Air Purifying.

Hydrotect™ by Crossville® purifies exterior air by reducing greenhouse gases, environmental pollutants and volatile organic compounds. When exterior walls coated with Hydrotect by Crossville are exposed to light, nitrogen oxides produced by exhaust fumes and smoke break down into harmless nitrates. In fact, a 10,000-square-foot area of tiles can clean the air as effectively as 70 poplar trees or green space the size of four tennis courts.

From corporate to healthcare and hospitality, to retail, architects and designers, count on Crossville to deliver the distinctly American, uniquely Crossville design aesthetic with American-made ingenuity.

Visit CrossvilleInc.com or contact our technical support staff to learn more.

Get Planked® Program

AV214 Gallery Grey and AV215 Boutique Black 3 x 18 UPS Get Planked

NEED IT IN PLANKS?

Found the perfect tile, but need it in planks?

Crossville® now offers each of its Porcelain Stone® products in popular plank shapes. With no minimum order and quick order fulfillment, you'll be seeing planks in no time.

Depending on the product selected, there are 4 possible widths and 7 possible lengths, which add up to more than 2,596 shape combinations.

Many of Crossville's tiles are now available in the much-requested Half-Plank size (square tile cut in half). For the latest information about half-planked tile, please visit CrossvilleInc.com or phone: 931.484.2110.

Recycled Content

At Crossville®, we put our name behind every product we sell. That's why we have developed the EcoCycle Tile Process™ logo, which will be shown in conjunction with products containing recycled content. Tile containing a specified minimum amount of recycled content will be designated with a percentage shown in the logo. In addition, this logo will specify the nature of the recycled content, such as pre-consumer or post-consumer.

Recycled Products

Crossville® recycles nearly 12 million pounds of previously discarded filtrate and fired tile waste. In addition to its own fired waste recycling, Crossville also accepts and recycles reclaimed, previously installed tile through its Tile Take-Back™ Program. For more information, visit CrossvilleInc.com/green.

TILE TAKE-BACK

Tile Take-Back® Program

With our Tile Take-Back Program, Crossville®, the tile industry's leader in sustainable initiatives, has solved the major environmental problem facing the tile industry today: recycling fired tile.

Until now, pre and post-consumer tile has been considered non-recyclable. While many tile manufacturers, including Crossville, have successfully reused scrap powders and unfired tile, hundreds of millions of pounds of damaged or otherwise unsellable fired tile (tile in its finished state), have gone to landfills each year. Additionally, there has been no environmentally friendly manner to dispose of previously installed tile.

We have developed a proprietary system of processing porcelain tile back into powder used in manufacturing new tile. The resulting new products will have a verifiable recycled content, and more than 4 million pounds of tile that Crossville has previously sent to local landfills will be recycled. This is in addition to any tile Crossville will receive through our ground-breaking Tile Take-Back program.

Not only will the new process allow Crossville to re-purpose its own scrap tile, but will allow the company to take back samples and previously installed tile, always a concern for environmentally-minded designers and building owners.

Crossville is now incorporating powder produced from recycled tile in its manufacturing and has begun implementing its Take-Back program for samples and installed tile.

LEED

Leed Information

For information on Crossville's recycled products and their relation to LEED Information, please visit CrossvilleInc.com.

PRACTICES

Green Squaredsm Certification

The Standard in Sustainability for the Tile Industry in North America ANSI A138.1. Green Squared is the stringent and powerful new measure for tile industry sustainability developed by Tile Council of North America under the American National Standards Institute (ANSI) process.

Green Squaredsm

- Evaluates products and processes in five key environmental and social categories:
 - product characteristics
 - manufacturing operations
 - corporate governance
 - innovation
 - end-of-life product management

- Recognizes manufacturers for leadership in environmental stewardship and corporate responsibility
- Serves as the standard bearer to ensure transparent, full disclosure of sustainability product by product, manufacturer by manufacturer - industry wide

EcoCycle Tile Process[™]

Crossville has two primary means of recycling waste that would otherwise be sent to local landfills. Crossville recycles nearly 12 million pounds annually of previously discarded filtrate and fired waste.

Crossville: First Among the First

Crossville[®] was the first manufacturer to achieve Green Squared certification for its entire U.S. manufactured porcelain tile product line-up, which is manufactured in Crossville, TN, as well as its production processes.

PARTNERSHIPS

Sustainable Partnerships

In our efforts to preserve the environment, Crossville[®] has partnered with TOTO USA, the world's largest plumbing products manufacturer to recycle pre-consumer waste. Crossville has developed a proprietary system of processing TOTO's sanitary ware waste back into powder used in manufacturing new tile.

In March 2011, Crossville became a net consumer of waste, meaning we recycle more waste into new products than we generate through our manufacturing processes.

This recycling conserves resources; the volume of finished goods Crossville ships now exceeds the amount of raw material it extracts from the earth for use in manufacturing.

Sustainable Operational Procedures

In order to minimize our impact on the environment, Crossville[®] goes beyond offering recycled products. Crossville's sustainable operational procedures include:

- Printing of marketing materials at Forestry Stewardship Council certified facilities; use of soy inks and recycled paper whenever possible.
- Packaging of samples, merchandising materials and piece goods with recycled/recyclable wrapping and cushioning.
- Company-wide recycling program for all office and production facility paper waste.

DESIGN TOOLS

Planning and visualization tools for designers and architects at CrossvilleInc.com.

Mosaic Builder

Choose from nearly endless combinations of Crossville glass tile colors and sizes to design custom mosaic for walls, floors and more.

Cross-Vision®

Create, save and print visualizations of paint and flooring combinations, either within stock Crossville environments or via your own uploaded images.

Floor Patterns

Explore nearly 100 floor tile patterns with suggested tile sizes and collections for each.

Selecting a Grout

Find the best grout types and colors to complete your tile design.

Request your favorite tile in popular plank sizing (most Crossville collections are eligible).

GSA ADVANTAGE

Quality Crossville® products are available at GSA pricing

Designing for government projects? You'll be glad to know that Crossville's extensive line of award-winning Porcelain Stone floor and wall tile and our line of accent tiles are available to government customers at GSA pricing.

Fast delivery

Centrally located in Crossville, Tennessee, we have an industry-leading logistics system to ensure you get your tile when and where you need it, on time and on budget.

On contract

Available on GSA contract number GS-07F-0429 and TXMAS Contract No. TXMAS-5-0560. Crossville® products may also be purchased on many State contracts.

NATIONAL ACCOUNTS

Clients working on a national basis face unique challenges and a needs partner with the ability to meet their requirements across large geographical areas to ensure that every site consistently receives high quality material on time. That's where the Crossville National Account Team steps in. With extensive experience in the retail, automotive, quick-serve restaurant, convenience, and hospitality segments, our in-house National Accounts Team has what it takes to manage supply-chain needs. They provide expert materials forecasting, sales support, order processing and inventory management. What's more, our special pricing programs assist our customers with their cost-control performance.

Contact a National Accounts representative at (931) 484-2110 to learn more about the following:

- Dedicated customer focus with more than 26 years of service to commercial development
- State of the art logistics to ensure major market delivery 2-3 times per week
- Controlled pricing and inventory management
- In-house Technical Services department to assist with installation specification and maintenance recommendations
- Extended product warranties
- Custom design

NOTE: Trim applications will differ from field tile applications for the same series.

† 2 x 2 or 3 x 3 UPS mosaic only, see Tile Performance Data Chart for additional information on wet area use for mosaic tiles.

†† Recommended for light-duty horizontal use in residential applications only.

††† 4 x 4 hex for light-duty horizontal use in residential applications only.

Suggested Cleaners For Problem Stains

In keeping with Crossville's long-standing position on sustainability, we highly recommend the use of low VOC, non-hazardous, and non-polluting products for cleaning and maintaining tile and grout (for specific problem stains, please use the following stain removal chart).

These products are used by tile and maintenance professionals and may not be readily available in all areas. Most household cleaners are sufficient to clean common stains as long as they conform to the standards set forth in the Daily Maintenance Section. In the case where stain removal becomes a problem, contact a cleaning and maintenance product supplier or your local tile distributor for professional suggestions.

In keeping with its commitment to quality, Crossville® will offer its Technical Service Department for individualized assistance. This department can assist you in the proper installation and maintenance of all Crossville® Porcelain Stone® tiles. Contact Crossville Technical Services at 931.484.2110.

Crossville® recommends the use of professional cleaning and maintenance products. If additional information or assistance is required on a contaminant not listed, or if you need to find out where the products are sold, please call us, or contact one of the following:

To download a copy of "How to Care for Porcelain Stone® tile," be sure to visit our web site at CrossvilleInc.com.

Special Services

Loose samples for Architects and Designers. See back cover for details.

Chip Kits are available through your local distributor.

Custom patterns using 3 x 3 Color Blox Mosaic® may be ordered through your local distributor; please allow adequate lead time.

Water jet cutting service offers infinite design possibilities from company logos to the most intricate of murals. Contact your local distributor for more details.

Crosstyle® provides custom cutting any of Crossville® Porcelain Stone® tile into any geometric, straight-edged piece 2 x 2 or larger.

Crossville® now offers each of its Porcelain Stone® products in popular plank shapes, with no minimum order and quick order fulfillment (most Crossville® collections are eligible).

Given the extreme hardness and durability of Crossville® Porcelain Stone®, cutting the tile or drilling holes requires specific blades and drill bits. Go to CrossvilleInc.com, and visit the Literature and Catalog/Installation Guide section for our cutting and core drilling guides.

Crossville® offers a booklet of pattern layout designs called the "Pattern Book". Contact your local distributor or visit Crossville's website at CrossvilleInc.com.

Crossville offers custom color service. Minimum order requirement and special set-up fees apply.

Crossville offers Cross-Grid®, a process that grinds all four sides of our Porcelain Stone® tiles. This squaring is also called rectified, and it allows the tile to be installed with narrower grout joints.

Crossville's website offers a variety of additional tools and information valuable to both professionals and homeowners.

SAMPLE MATERIALS

Samples are available online, at CrossvilleInc.com. Simply pick the color you like and add to your sample cart. Samples are shipped ground services to the address you provide. Color reproduction in the photography in this catalog is representative only. Slight variation is inherent in fired porcelain, glass, and natural stone. Before selecting a color, review actual samples available via CrossvilleInc.com or your local dealer.

Wet DCOF/Safety Considerations

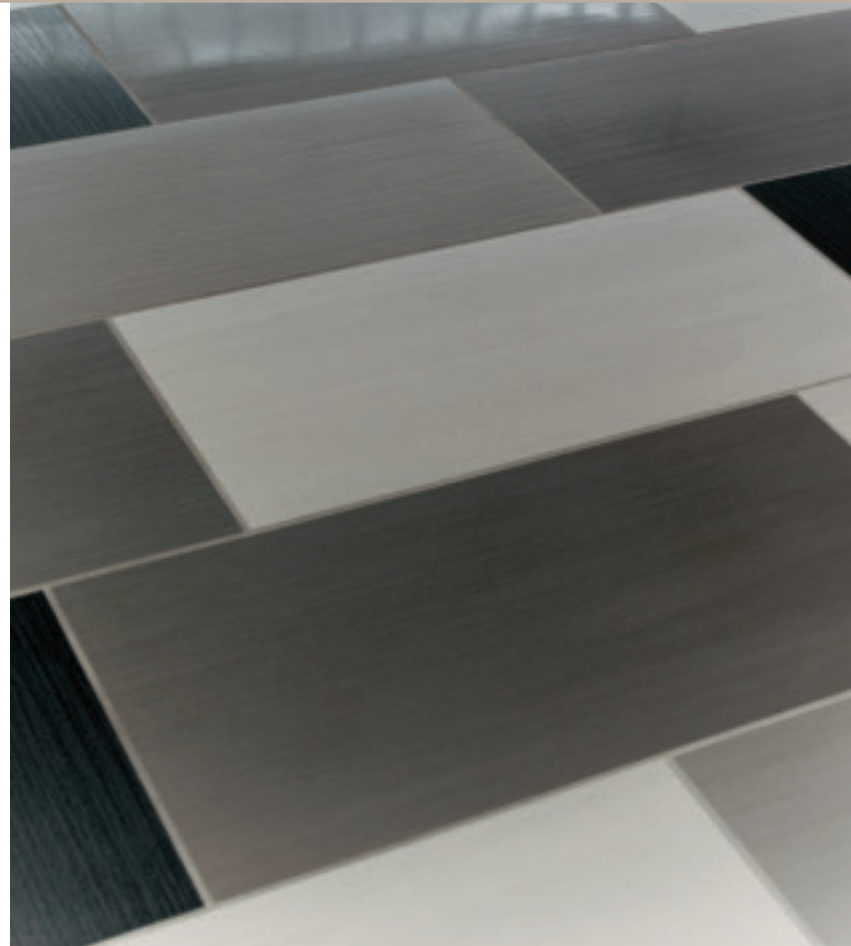

DCOF ACUTESTSM

The Wet DCOF AcuTestSM is the new standard for accurately determining the actual slip potential on a tile surface. Developed by the Tile Council of North America (TCNA), the Wet DCOF (Dynamic Coefficient of Friction) AcuTest is a repeatable, reproducible method of measuring slip potential. This method uses a specifically engineered device to perform the required testing, ensuring the most precise results. The Wet DCOF AcuTest is included in the latest version of ANSI A137.1 Specifications for Ceramic Tile.

The Tile Council of North America (TCNA), established in 1945, has a leadership role in promoting the use of ceramic tile and in developing North American and international industry standards. To learn more about TCNA, please go to www.tcnatile.com.

The defining threshold value is 0.42 for level interior spaces expected to be walked upon when wet, a wet DCOF of less than 0.42 shall only be installed when the surface will be kept dry when walked upon and proper safety procedures will be applied when cleaning the tiles.

SAFETY CONSIDERATIONS FOR TILE

- In areas where standing water may occur, selected tile should have an elevated DCOF rating. Please refer to the "Tile Performance Data" page for additional information.
- Polished tile should not be used in areas where standing water, oil, or grease may be present due to the tile's low coefficient of friction.
- Pool deck tiles, whether interior or exterior, should have a surface texture that provides an elevated DCOF rating. Please refer to the "Tile Performance Data" page for additional information.
- Ramps or inclines should have an increased DCOF.
- There are no tiles that are slip proof, only slip resistant.

Test results available on request.

Like any material, Crossville® tile can become slippery when wet. We recommend that care be taken to keep the surface dry.

Color reproduction in the photography in this catalog is representative only. Slight variation is inherent in fired porcelain and natural stone. Before selecting a color, contact your local representative for live samples or call Sample Express at 1.800.221.9093.

Wet Area Use For Mosaic Tiles

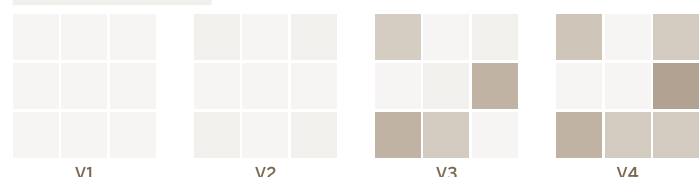

Crossville® produces mosaic tiles with the Cross-Sheen® finish. The AcuTest™ Wet Dynamic COF is ≥ 0.42. Their small sizes ensure frequent grout joints which provides traction and drainage.

Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water, and poor surface cleaning.

This information is provided so that customers may make a realistic and informed decision when comparing Crossville's mosaic to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Shade & Texture Index

V1 = Uniform Appearance	Differences among pieces from the same production run are minimal.
V2 = Slight Variation	Clearly distinguishable differences in texture and/or pattern within similar colors.
V3 = Moderate Variation	While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or textures to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.
V4 = Substantial Variation	Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or textures from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

Inspect products upon delivery and for best results, blend tile from several cartons during installation.

DEFINITIONS

Bullnose* – Rounded convex trim used to provide a smooth, rounded edge for countertops, stair steps and building corners. This is the most used trim shape for wall tile installations. Wall tile bullnose is sometimes referred to as surface cap. It has one rounded finished edge on the tile and can be used horizontally or vertically. Left Bullnose Corner & Right Bullnose Corner also referred to as Double Bullnose.

Calibrated Tile – Tiles that have been sorted to meet a pre-determined acceptance of variable range in size. Crossville® recommends a minimum grout joint of 3/16 inch.

Cross-Sheen® (UPS) – An invisible, integrated finish that protects the look of nearly any Crossville tile from the defacing effects of scuffs, stains, even permanent marker, and graffiti.

Cross-Slate® (CS) – The Cross-Slate® finish combines the rustic and textured feel of slate with the through-body color and durability of Porcelain Stone® for strong commercial value where enhanced traction is needed. Cross-Slate is recommended for high-traffic interior and exterior walking surfaces in both residential and commercial environments.

Cross-Tread® (CTS) – Enhanced traction and ease of maintenance make this texture a suitable choice for wet and greasy interior floor areas and exterior walking surfaces. The Cross-Tread® surface pattern is eye-catching, making it a great option for transitional areas and for use as an accent tile.

Cove Base (Standard, round top)* – This cove base has a rounded finished top like bullnose and is used as a cove base in areas that will not have wall tile installed above it.

Cove Base (Universal, flat top)* – This cove base has a finished, flat top. It can be used alone or with tile stacked on top. Exception: Color By Numbers® cove base has an unglazed, flat top.

Dynamic Coefficient of Friction (DCOF) – Sometimes called kinetic coefficient of friction. This is the ratio of the force necessary to keep a surface already in motion sliding over another divided by the weight (or normal force) of an object. This force is a materials property of the two surfaces. DCOF is usually less than SCOF for the same materials. Contaminants such as dirt, water, soap, oil, or grease can change this value.

Honed – Tile that has had the surface mechanically altered to a uniform, semi-polished finish.

Modular – Tiles of various dimensions are sized so that they may be installed together in patterns with a common specified joint width. The difference between Actual and Nominal is the grout joint.

Patterned (PTN) – A repeated, decorative texture or finish created for visual interplay and/or interest.

Polished (PO) – Polished Porcelain Stone® is a practical alternative to natural stone with its attractive, mirror-like finish and can be used with other surface textures to increase visual interplay and interest. Polished finish adds a look of elegance and sophistication to interior floors and interior and exterior walls. Polished finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Rectified/Cross-Grid® – A tile that has had all edges mechanically finished to achieve a more precise facial dimension. 3-4mm grout joint recommended.

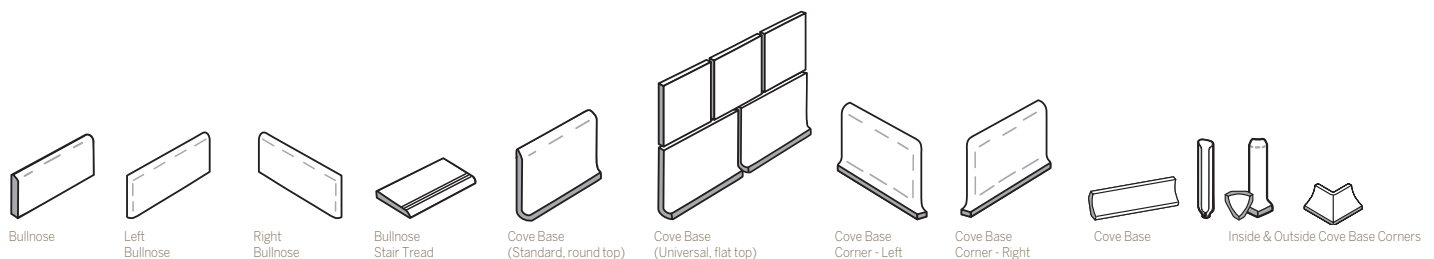

Satin – Tile that has had the surface mechanically altered to produce a smooth, semi-matte finish.

Textured (TX) – The appearance and rustic look of natural slate.

Through-body Color – The color is the same through and through the tile.

Unpolished (UPS) – Cross-Sheen® finish imparts a subtle glow to an unpolished surface that enhances color and allows scuffs, stains, and even permanent marker and graffiti to be easily removed. Unpolished with Cross-Sheen® finish is appropriate high-traffic interior floors and walls where low maintenance is desired. Unpolished with Cross-Sheen® finish is not recommended for wet areas where standing water may occur or for exterior horizontal and/or walking surfaces.

Cool Springs Galleria

Franklin, TN

When a designer for a large shopping mall wanted a unique flooring solution, Crossville worked with them to develop an additional gray from our Shades lineup to create an ombré effect. Not only did we give them the look they wanted, we also created a special run to get the tile they needed quickly.

[View this case study at CrossvilleInc.com](https://www.crossvilleinc.com)

Archer Hotel

Austin, TX

When a boutique hotel wanted a distinctive look for their Texas location, Crossville stepped in to provide textured tile solutions that are durable and easy to clean while also providing a rugged aesthetic that would impress any urban cowboy.
